The Strategic Benefits of Cloud eDiscovery Software & Services

Cloud computing and SaaS are the zeitgeist of the modern IT professional and increasingly the legal industry is working through how best to grapple with maintaining a balance between the speed, power and uptime vs control and security of managing client's data in the cloud.

The CIOs of today's organizations are no longer solely responsible for the management of IT, but for also supporting business growth by driving innovation whilst lowering costs.

Whilst enterprise document management solutions have started to move into the cloud with Office 365, most eDiscovery solutions are still run on premise under a law firm's firewall. So the question for most is how best to respond?

How can I lower the total cost of supporting eDiscovery within the business? How can I continue to provide the latest and greatest features and commit to a perpetual upgrade path? How do I liberate my team in order to focus on key strategic initiatives and innovation?

We believe we know the answers so come along to hear how.

Sky Discovery, in partnership with kCura and InPlace Solutions will talk you through the growth of cloud and managed eDiscovery software and services and what it means for the market in Australia.

The agenda will include presentations from the following leaders answering questions around the following;

What does the growth of cloud mean for law firms? How to navigate the minefield?

Patrick Ng – Principal Consultant @ InPlaceSolutions

Patrick has almost 20 years' experience within professional services including many years as IT Director of a national law firm. He has also consulted to manufacturers, educational institutions, retailers, property developers and tech firms and is a respected commentator on legal tech.

A frank and logical communicator with a creative yet socially aware approach, his industry expertise covers both strategic and operational briefs. His tech expertise covers pretty much everything a professional services organisation could wish for including cloud EDMS, practice management, case management and eDiscovery.

Why is kCura going SaaS? What do we want to deliver for our customers?

Andrew Sieja – CEO and Founder of kCura

A developer by trade, Andrew Sieja is the founder and CEO of kCura, a global software company that builds Relativity—an application that helps the legal community manage and analyze electronic data during litigation and investigations. Andrew started kCura as a software consultancy in February 2001, and has since grown it to be a leader in electronic discovery with more than 600 team members. Relativity is used by more than 135,000 active users, and its customers include the U.S. Department of Justice and more than 190 of the Am Law 200.

Andrew was named Ernst & Young's Entrepreneur of the Year and inducted into the Chicago Area Entrepreneurship Hall of Fame in 2013. kCura received the Merrick Momentum Award from the Chicago Entrepreneurial Centre in 2014—recognized as "the top up-and-coming company" in Chicago—and has been included in Deloitte's Technology Fast 500 list for four consecutive years.

What are law firms looking for from providers around managed services? What does the future of eDiscovery services look like?

Jeff Jarrett – Director of Consulting @ Sky Discovery

Jeff has 14 years' experience in industry, with a background including US Department of Justice criminal fraud cases and private consulting to New York City area top law firms, as well as 7 years of experience servicing the Australian market. Jeff focuses on change management through a mixture of software supporting Australian technical requirements, software to enforce process, persona specific training modules, best practice templates & ad-hoc hands-on project consulting.

Jeff has been one of the leading eDiscovery voices in the Australian market over the last decade, often featuring in events and webinars around advancing eDiscovery technologies and practical solutions.
